- 4. Only 10,000 of the 100,000 m. Frid tons of potatoes which were to be exported by the end of the third quarter of 1952 were actually fall, and the remaining 90,000 tons are to be delivered starting 10 October 11 of Berlin is to receive 21,310 tons from Brandenburg, 12,500 tons from Mecklenburg, and 25,650 tons from Saxony Anhalt a total of 70,000 tons; Necklenburg is to export 20,000 tons to Hungary.
- 5. It was impossible to begin storing potatoes on I September as planted, since the population at that time still refused to accept storage potatoes. Potato storage did, however, begin on 20 September. By the end of September results were generally satisfactory; in Saxony-Adial and Berlin, it was expected that storage would be completed by the end of October or the beginning of November. It was therefore possible on I October to permit the producers to begin direct storing as planted Between 5 and 15 October, a serious shoringe of railroad cars caused difficulties which may endanger plans to supply the population with stored potatoes.
